Concept 128 NpH
Disinfectant Cleaner Deodorant Concentrate

Broad Spectrum Germicide
Regular and proper use of disinfectants is a proven method of preventing the spread of illness by reducing cross infection. Concept 128 NpH is based on a powerful quaternary ammonium compound for total germicidal activity. It has demonstrated efficacy on a broad range of gram negative and gram positive bacteria including Staphlococcus, Salmonella and Pseudomonas as well as the Herpes Simplex Type 1 and the HIV-1 (AIDS) virus. Concept 128 NpH is fungicidal against Trichophyton Mentagrophytes (Athlete’s Foot) and will inhibit the growth of mold and mildew on hard non-porous surfaces.

Neutral - No Rinse Cleaner
Concept 128 NpH is a pH neutral detergent that performs as well as most alkaline cleaners. Formulated with high concentrations of water conditioners (chelates) and pure synthetic detergents, it readily lifts surface soils, trackage and scuff marks without alkaline bite that can dull gloss and shorten finish life. Concept 128 NpH leaves no film or haze even with daily use. It is safe to use on all washable surfaces and reduces the potential for user skin irritation associated with high pH cleaners.

Effective Deodorant
Many common malodors are caused by bacterial activity, the growth of mold and mildew or putrefication. Cleaning with Concept 128 NpH will eliminate the source of these odors and leave treated areas with a light clean fragrance.

Economical
For non-medical applications like schools, offices, apartments, hotels, motels and industry, a 1 ounce per gallon dilution (128-1) will provide an effective cleaning and disinfecting solution at a use cost competitive to many ordinary (not germicidal) mopping detergents.

Serving the maintenance community since 1933
Registered Label Claims

Dilution Rates:
- Hospital Disinfectant: 2.0 oz. per gallon
- Non-medical Disinfectant: 1.0 oz. per gallon
- Virucidal: 1.0 oz. per gallon
- Sanitizing (Non-food contact): .5 oz. per gallon
- Fungicidal: 1.0 oz. per gallon

Bactericidal Claims:
- Brevibacterium Ammoniagenes: Cause of diaper rash
- Enterobacter Aerogenes: Bacteria in sewage, soil, human and animal feces
- Escherichia Coli: Cause of intestinal diseases
- Klebsiella Pneumoniae: Cause of infection in urinary and respiratory tracks
- Pseudomonas Aeruginosa: Infection particularly dangerous to burn patients
- Salmonella Choleraesuis: Food poisoning
- Salmonella Schottmuelleri: Cause of enteric fever and paratyphoid fever
- Shigella Dysentariae: Cause of dysentery in man
- Staphylococcus Aureus: Cause of golden Staph infections
- Streptococcus Faecalis: Cause of urinary tract infections

Virucidal Claims:
- Herpes Simplex Type 1: Causes skin lesions
- HIV-1: AIDS infection
- Influenza A/Brazil: Influenza
- Vaccinia Virus

Fungicidal Claims:
- Trichophyton Mentagrophytes: Athlete's Foot

Wayne, your maintenance partner...

Top quality products are an important component of a quality maintenance program. Your Wayne Representative is trained to assist you in developing your maintenance system to provide labor efficiency, safety information, proper chemical management, inventory control and employee training.

Responsible packaging is part of today's business concerns. Wayne Concept 128 NpH is packed in containers classified as a "2" within the chasing arrows symbol, identifying high density polyethylene, a recyclable plastic.
