

# Encap-Ox

## 4-in-1 Encapsulating Carpet Cleaner

- Made with a new generation polymer encapsulant
  - Creates cleaner, finer encapsulating crystals
  - Better vacuum removal, cleaner fibers
- Hydrogen peroxide-based technology for superior cleaning
- Reduces static attraction = less dry soil retention
- Spot clean without rinsing
- Turns dry vacuuming into dry cleaning

Ideal for large area, low moisture extraction

Extraction Cleaning

Spot Removal

Bonnet Cleaning

Encap-Ox combines the revolutionary Acri-Sorb 60 new generation polymer with hydrogen peroxide cleaning technology for superior encapsulating action.

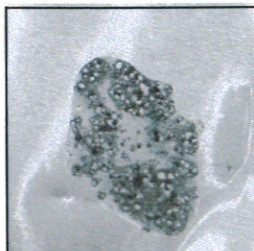

On initial cleaning, Encap-Ox captures dirt and any detergent residue in a brittle polymer film that is easily and completely removed by dry vacuuming. It eliminates sticky, detergent film that attracts soiling.

The polymer continues to keep carpets clean by reducing the static attraction that holds dry soil to carpet fibers, thus increasing the amount of soil removed during each vacuuming.

HMIS RATING (USE)	
HEALTH	1
FLAMMABILITY	0
REACTIVITY	0
PROTECTION	B

**Encapsulating Dry Comparison:** Equal amounts of product concentrate is placed on aluminum dishes and allowed to completely dry. These images show the residue when dry, which indicate the residue left on carpet fibers.

### Competitor

Competitor dries with granular residue.

### Encap-Ox

Encap-Ox dries clean and virtually clear.

## ENCAP-OX: ENCAPSULATED, OXYGENATED CARPET DETERGENT

- **Detergents and solvents** absorb oily soils.
- **Peroxide** brightens fibers, removes stains, and neutralizes odors from organics like urine and milk.
- **Polymers:**
  - Combine with detergent solution to absorb oils and dirt.
  - Prevent soil from re-depositing on carpet.
  - Encapsulate soil, dries to a brittle film and detaches from carpet fibers for easy vacuum removal.
