

Heavy Duty 23%

Toilet & Urinal Cleaner

Cleans - Deodorizes

Professional Strength Cleaner

- ◆ 2-1/2 times the cleaning power.
- ◆ Does tough jobs ... Fast!
- ◆ Saves time, labor and money.

There is an old saying... "You can't drive a railroad spike with a tack hammer". Actually you can, but it takes a lot of work. Professionals select the tool to fit the job.

Extremely hard water can develop measurable encrustations of lime, calcium and rust on toilets and urinals ... sometimes in as little as one day. While conventional, low acid cleaners will remove these deposits, it can take many applications to finish the job.

Wayne Heavy Duty 23% makes short work of unsightly accumulations. It quickly dissolves hard scale, lime and rust with a single application leaving toilets and urinals sparkling clean and deodorized. The right product for a tough job.

Product Placement

Wayne Heavy Duty 23% is recommended for use in extreme hard water conditions or as a restorative cleaner when fixtures have been too long neglected between cleanings.

Advantages

- ✓ 2-1/2 times more hydrogen chloride for maximum descaling.
- ✓ Eliminates need for reapplication ... saves time and money.
 - ✓ Inhibited to protect pipes and traps.
 - ✓ Harmless to septic tank action.
