

BIG O

Waterless Cleaner

Dry cleans sealed wood
Prepares floors for resurfacing

Effective cleaning

Wayne Big O is a blend of mild natural solvents formulated for “dry” cleaning of previously sealed wood flooring and wood surfaces. Rubber burns, soil, dirt, oil and tar are easily removed. It dissolves heel marks, chewing gum, solvent wax and finish with a minimum of agitation. Big O Waterless Cleaner is a fast and effective preparation chemical to condition gymnasium and other wood floors for re-application of polyurethane or epoxy sealer.

Safe Cleaning

Water and wood floors are a dangerous combination. Wood floors and surfaces can buckle or warp from exposure to water based products. This is not a problem with Big O's solvent based formulation. It can be used without the concerns associated with the use of detergents or other water based products. Big O not only does a safe job; it leaves no residue. Controlled fuming and a natural fresh orange fragrance reduce the possibility of worker irritation.

Ecologically desirable

Big O Waterless Cleaner contains no hazardous chlorinated hydrocarbons or benzene derivatives, like 1,1,1 trichloroethane, methylene chloride, perchlorethylene or dichlorobenzene. Component ingredients are not listed as toxic chemicals subject to the reporting requirements of 40 CFR 372.45 Section 313 of the Title III of the Superfund Amendment and Reauthorization Act of 1986.

Use on:

- Gymnasiums
- Parquet Floors
- Sealed Wood Surfaces

Available in 5 Gallon Pail
Product# J11BO5

Manufactured by:

Wayne Concept Manufacturing Co., Inc.
