CTR-17

Concrete Truck Reconditioning
Chemical Cleaner and Deoxidizer

Dissolves and Removes ...

- ◆ Rust
- ◆ Scales
- ◆ Lime
- ◆ Corrosion
- ◆ Concrete
- ◆ Scum
- ◆ Mortar
- ◆ Minerals

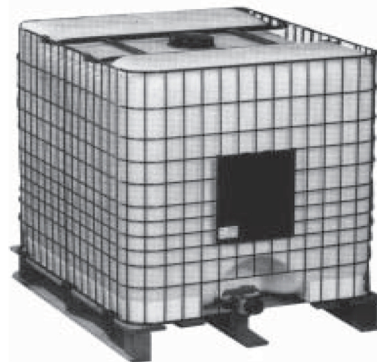

Economical, Effective and Easy to use

Proven performance: For over 30 years, CTR-17 has proven its value for cleaning and renovating concrete trucks, forms, equipment and mixers. A powerful blend of hydrogen chloride, corrosion inhibitors, penetrants and wetting agents, CTR-17 goes to work on contact to penetrate and dissolve concrete residue for complete and easy removal with a pressure rinse.

Economical and Easy to use: CTR-17 is supplied ready-to-use ... no metering, mixing or measuring is required. Applied with a low pressure spray or brush, it generates copious foam to increase dwell time on vertical surfaces and allows uniform application. Low per gallon cost and unmatched efficiency in use make CTR-17 a favorite with cost conscious fleet managers.

Packaging: J11CTR1755
55 gallon poly Drum

J11CTR17T
275 gallon Tote
