

Crystyl Fresh

Encapsulating Odor Absorbent for Fabric, Carpet and Upholstery

FAST AND EFFICIENT ... KILLS ODORS ON CONTACT

Crystyl Fresh is made with ODX-200, a remarkably effective odor neutralizer with a proven record of success in the challenging fire restoration industry. It is effective in the elimination of odors caused by tobacco, food preparation, perspiration, pet odors, decomposition and human and animal waste.

ECONOMICAL ... A LITTLE GOES A LONG WAY

A single gallon of Crystyl Fresh will treat up to 2,000 square feet of carpet for around 1¢ per foot ... or a full sized, four door sedan with fabric seats and carpet for less than \$5!

MADE FOR FABRICS ... NO DETERGENT BUILD-UP

Almost all water based deodorants utilize detergents to solubilize perfume oils. When applied to fabric the water and the perfume evaporate, but the detergent remains in the form of an oily film. Crystyl Fresh contains a unique polymer encapsulant that combines with our detergents and absorbs them into an invisible, brittle film that is easily and completely removed by routine vacuuming.

CONTROLLED FRAGRANCE RELEASE ... LASTS FOR HOURS

We originally formulated Crystyl Fresh without fragrance ... sort of a stealth deodorant. It worked great, but field tests indicated users tend to over apply and waste unscented products. When we added fragrance, we discovered an unanticipated benefit of polymer encapsulation. During the curing period, the polymer crystals released the fragrance slowly ... not the overwhelming perfume blast and fast fade common to conventional deodorant products.

- ◆ Chemically neutralizes odors
 - ◆ Prevents odor rebound
 - ◆ Controlled fragrance release ... lasts for hours
 - ◆ Absorbs oily film
 - ◆ No sticky residue
 - ◆ Reduces resoiling

Product# J11CF6 Case 6 quarts
J11CF1 1 gallon, packed 4 per case

Crystyl Fresh

WHO USES CRYSTYL FRESH ... AND WHY

Apartments ... Great for move outs or musty odors from unventilated, closed units.

Car Dealers ... Smelly used cars don't sell.

Caterers and Reception Halls ... No one wants to smell the last party.

Clinics and Hospitals ... Eliminates medicinal odors, sick room smells.

Conference Rooms ... A lot of people in a confined area.

Dormitories ... College Kids ... 'nough said.

Hotels and Motels ... Some smokers won't quit.

Mobile Home Dealers ... Clean smell = clean sale.

Veterinary Clinics ... Sort of like a conference room for pets ... too many ... too close.

DIRECTIONS AND COVERAGE

Carpet: Apply undiluted Crystyl Fresh to dry carpet using a low pressure sprayer adjusted to deliver a fine mist. Cover entire area including edges and corners. Spray until fiber is uniformly damp. Coverage should average between 500 and 2,000 square feet per gallon depending on severity of odor and carpet pile density.

Note: Pet odors and spots should be treated with Wayne Bio-Plex D prior to cleaning and deodorizing.

Drapes and Fabric Wall Coverings: Apply undiluted Crystyl Fresh with an electric fogger or manual sprayer. Spray until damp. For periodic freshening, spray bursts with a trigger sprayer adjusted to a fine spray over any fabric surface.

Upholstered Furniture: Apply undiluted Crystyl Fresh with an electric fogger or manual sprayer adjusted to deliver a fine mist. Spray entire chair ... front, sides and back as well as both sides of loose cushions. For most malodors, use 6-8 ounces per chair. For smoke odors, increase dosage to 10-12 ounces.
