

New Formula

THE BEST

Hand Dishwash Pot and Pan Detergent

**“The Best”
just
got better!**

New and improved, Wayne's formulation provides superior oily film removal from pots, pans and plastic food storage containers. “The Best” is a highly concentrated blend of cosmetic grade detergent manufactured specifically for hand washing of glassware, dishes, pots, pans and kitchen equipment. It penetrates and lifts dried on food and grease and holds soil in suspension to prevent redeposition. “The Best” produces rich, stable suds that resist breakdown in heavy soil loads or cool water. Cleaned surfaces rinse clear and dry free of spots, haze or streaks.

Detergency • Suds • Value • Results

“The Best” puts an end to all you hate about hand dish washing. A new pH balanced detergent that is gentle to your hands while tough on all food soils. In seconds, it cuts through dried egg yolk, grease, gravy, sauces and starch. Baked on food, cooking oils and other pot and pan problems are handled with a minimal brushing. Soils are suspended by the detergent to prevent redeposition on clean surfaces.

“The Best” suds are stable dense and long lasting. Suds resist breakdown caused by heavy soil loads or cool water. You can clean more dishes per charge - without changing solution. You will notice the difference the first and every time you use it.

“The Best” is value, It is compounded of high concentrations of cosmetic quality ingredients. Its performance meets the high standards of the institutional food service industry. Concentrated for economy. “The Best” is a true friend of budget conscious consumers. Put it to work for you and you'll see. There's just no comparison.

“The Best” gets results. Pots and pans literally wipe clean. Dishes and glassware dry clear, free of spots or streaks. And, cooking vessels come out the best ever. Everything you want or need in a hand dish wash.

The Best Directions For Use

1. For dishes or glassware, use ¼ to ½ ounces per gallon of water.
2. For greasy pots, pans or equipment, use 1 ounce per gallon of water.
3. Immerse items to be cleaned in solution and allow to soak for a few minutes.
4. Rinse thoroughly in clear water.

For maximum economy, the use of a mechanical proportioning device is suggested. The unit easily attaches to a faucet. With a push of the button a precise amount of “The Best” is added to the water flow. Waste is virtually eliminated. Wayne “The Best” is packed in 4/1 gallon per case and 5 gallon pails.
