

Fire Dog

Smoke Odor Reagent Deodorant Concentrate

- ✓ Concentrated for economy
- ✓ Neutralizes smoke odors
- ✓ Water soluble
- ✓ Safe on hard surfaces, carpet & upholstery

Wayne Fire Dog is the faithful companion of the fire restoration specialist. It is a hard working, multi-application deodorant concentration formulated of ingredients proven effective in the suppression of airborne smoke odors and the elimination of reoccurring malodors at their source.

Fire Dog is safe to use on painted or varnished surfaces, carpets, fabrics and upholstery when used as directed. It is non-staining, nonflammable and compatible with most synthetic detergents.

DIRECTIONS

To deodorize charred or fire damaged surfaces (rafters, wall studs, sub flooring, etc.):

Dilute 1 part Fire Dog with 10 parts water (12 oz. per gallon) in a low pressure sprayer adjusted for a coarse spray. Wet exposed charred areas thoroughly and allow to dry.

To deodorize surfaces undamaged in the fire:

Add 2-4 ounces Fire Dog per mixed gallon of detergent/degreaser (Fire Chief H.D. Cleaner). Clean all surfaces thoroughly. Rinse with clear water.

To deodorize carpet or upholstery:

Add 1-2 ounces Fire Dog per gallon of mixed detergent in extractor. Clean as usual.

Use Notes: Fire Dog is compatible with most synthetic detergent. It is not compatible with soaps or soap bearing products.

SPECIFICATIONS

Physical form	Liquid
Color	Amber
pH concentrate	6.5 ± .5
Flash point	None
Specific gravity	0.982
Density	8.17#/gal
Water solubility	Infinite
Stability	2 yrs minimum
