

# G.P.S.

## Glass - Plexiglass - Stainless Cleaner & Conditioner

The handiest multi-surface cleaner you've ever used. If it's glass, plexiglass or bright metal you want to clean ... G.P.S. is the product you'll want to use. Its unique blend of solvents and wetting agents cut smoke film, finger prints, smears, oils, even lipstick with a quick spray and wipe. Cleaned surfaces dry clear, free of streaks and haze.

G.P.S. is safe to use on plexiglass and other soft plastics. It cleans bright metals and leaves a natural sheen ... free of rainbows and distorting film. Regular use imparts a mono-molecular, polymeric barrier that reduces dust attraction and resoiling.

G.P.S. is supplied in a convenient decanter bottle, ready to use. Formulated without ammonia, G.P.S. has a pleasant fragrance.

Product#  
J11GPS Case/12 quarts
