

NRFC No Rinse Floor Cleaners

Extends finish life ...

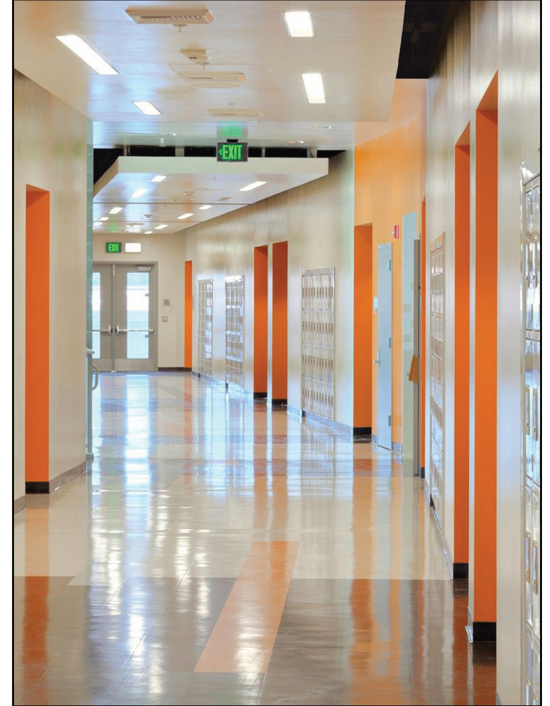

- ◆ Will not dull shine even with repeated use.
- ◆ Removes ice melt residue that can attack floor finish.
- ◆ Works in cool water.

Saves time ...

- ◆ Cleans ... really cleans the first time over.
- ◆ Requires no rinsing ... leaves no dulling film.
- ◆ Dries faster ... contains a drying accelerant to reduce downtime.

Convenient and Economical ...

- ◆ Available in three different concentrations and a variety of packages to suit any situation.

Wayne NRFC ... A different kind of "neutral" cleaner

Most neutral cleaners are a little wetting agent, a touch of fragrance and a **lot** of water ... much more neutral than cleaner. They won't dull the shine, but they don't do much cleaning either.

NRFC formulas are fully developed cleaners containing water conditioners to prevent hard water film and remove ice melt residue, mild alkalines to disperse oily film and soil, a drying accelerant to reduce trackage and blended wetting agents selected for free rinsing and non-streaking characteristics.

NRFC formulas are mildly alkaline in concentrate but are buffered to reach a neutral pH at end-use dilution the optimum balance of cleaning efficiency and protection for your beautiful floors.

The NRFC Line Up

One great formula Two concentrations

NRFC 64

High performance, competitive price

64-1 concentrate ... each gallon makes 64 gallons of premium quality, no rinse cleaner. The right concentration for users who require less than 20 gallons a week (about five mop buckets) of cleaning solution. Ideal for use wherever wall mounted or portable proportioners aren't practical. To prevent waste, the use of a 1 ounce metering pump is suggested.

J11NR641: 1 gallon
J11NR645: 5 gallon pail

I10901: 1 oz. Gallon Pump
I10901A: 1 oz. Pail Pump

NRFC 320

Waste Not Manufacturing Concentrate ... unmatched economy

Hyper-concentrated formula formulated for use at 320-1 dilutions. The most economical, high performance floor cleaner you can buy. Quart and gallon sizes are ideal for use in schools, food marts, retail stores and public buildings where permanent wall mounted proportioners can be utilized to control dilution. The quart portion control bottle is an excellent choice for multi-story buildings without mop closets on each floor to contract cleaners with several cleaning crews.

J11NR1: 4/1 gallon case
J11NRSQ: 6 quarts/case, closed loop insert
J11NRBQ: 6 quart/case, metered portion control
