

X-TRACT 1-2-3

Extraction Carpet Shampoo

New ... Ultra low foam formula

- ◆ Reduces vac motor damage caused by suds blow-by.
- ◆ Eliminates need for extra defoamer.
- ◆ Saves time ... less interruptions to empty partially full tanks.
- ◆ Ideal for compact extractors with restricted defoaming chambers.

Surface active agents (surfactants) make water wetter, speed penetration into impacted soils and suspend dirt into the cleaning solution for easy removal ... but surfactants tend to produce foam. X-Tract 1-2-3 is made with a new generation, ultra low foam surfactant that works like the best conventional surfactants, but generates very little foam. Exceptional performance with less foam related problems.

Buffered pH ... Reduces power fade across dilution range.

- ◆ 1 oz. per gallon dilution: pH 9.8
Strong enough for routine cleaning ... maximum economy.
- ◆ 2 oz. per gallon dilution: pH 10
A step up for heavier soil conditions ... traffic lanes.
- ◆ 3 oz. per gallon dilution: pH 10.2
Deep cleans oily soils ... yet safe on all commercial carpet.

pH puts the punch in detergents, especially against oily soils. But, pH must be controlled. Too high can cause damage. Too low retards cleaning. Many products start with a high pH (too high) and drop to neutral when diluted. X-Tract 1-2-3 is made with a complex builder system that reduces power loss and delivers the right amount of pH power required for every job.

A total performance package

- ◆ Deodorizes while it cleans ... neutralizes carpet odors, leaves area smelling fresh and clean.
- ◆ No tacky residue ... rinses completely, leaves no dirt attracting film.
- ◆ Exceptional cleaner ... penetrates, emulsifies and suspends oily soils, grease and particulates.
- ◆ Versatile .. works in hot or cold water extractors
- ◆ Economical... highly concentrated, effective at 1 ounce per gallon.

Product #: J11EX1 1-Gallon

***For a total performance extraction carpet shampoo...
X-tract 1-2-3 is the perfect solution.***
