- ✓ Reduces soap consumption
- ✓ Leaves hands soft and clean
- ✓ Contains healing Aloe Vera
- ✓ Non-staining
- ✓ Pleasant fragrance
- ✓ Works in all foam dispensers

Product #
J11MTK1 1-Gallon

Foam dispensing just makes good sense. A gallon of handsoap dispensed with a conventional dispenser will yield about 1,000 washes. A gallon of foam soap used with a foam dispenser will yield over 2,500 washes. Less soap used, fewer trips to refill the dispenser ... the savings are almost automatic. But, to maximize results, a good foam dispenser needs a quality foam soap.

Mahogany Teak is a luxurious quality handsoap made to compliment foam dispensers. It produces a rich, dense foam that discourages over-use. Our soap has a silky wet feel and a light pleasant fragrance. High levels of nature's aloe vera condition skin to reduce dryness and replace natural oils lost during washing. Mahogany Teak contains no artificial dyes to discolor counter tops.
