

Hi-Per

**Solvent Fortified - Hyper Concentrated
Industrial Degreaser**

Hi-Per

... it's all about performance

You can't drive a railroad spike with a tack hammer.. Well, you can ...but it's a lot of work. Similarly, you can do heavy industrial cleaning with a general purpose cleaner, but it's not very efficient.

Hi-Per's performance picks up where general purpose products fail. It handles the tough, detergent resistant problems caused by dense oils, lubricants, carbon black, rubber compounds, and ink. And Hi-Per restores oil soaked concrete and grout lines to original appearance.

Concentrated for economy and versatility

Hi-Per is built to a higher level of activity than most industrial cleaners. At strong dilutions, Hi-Per dissolves problem soils all purpose cleaners won't touch. At light dilutions, Hi-Per yields low use cost and retains cleaning efficiency up to 1:64 (2 oz. per gallon).

Product#

J11PER5 5 gallon pail
J11PER55 55 gal. drum
J11PERT 275 gal. tote

Benefits

- ☑ Works on tough, detergent resistant soils
- ☑ Saves labor
- ☑ Versatile applications
- ☑ Low use cost
- ☑ Free rinsing

How Hi-Per works:

1. High concentration of solvents penetrate and thin dense soils to speed detergent action.
2. Alkaline builders break down and solubilize grease and oils.
3. Detergent emulsifiers couple oil and water into solution for easy removal.

Used by:

Auto repair shops
Flooring contractors
Heavy manufacturing
Printing companies
Rubber compounders
Tire companies
Trucking companies
Wire manufacturing

Use to:

Degrease concrete and quarry tile
Remove latex adhesive
Clean print rooms
Degrease road equipment
Remove tire marks

Manufactured by:

Wayne Concept Manufacturing Co., Inc.
Fort Wayne, IN 46825 260-482-8615

Serving the maintenance community since 1933
