

Paragon

Hard Floor Seal and Finish

Ideal for use on quarry tile, terrazzo, slate, & ceramic floors.

Easy to apply and maintain.

Beautifies, intensifies colors and never yellows.

Adheres to dense surfaces.

Urethane fortified for maximum durability.

One product Spectacular floors.

Paragon is a urethane fortified, sealer finish designed to protect and beautify stone, slate, quarry tile and ceramic floors. It has exceptional adhesion characteristics that enhance its ability to bond with high density, low porosity surfaces and provide long term durability under conditions where conventional sealers fail.

Paragon applies easily and levels to a beautiful, rich gloss. Once dry, it resists dirty and tracked in soils for maximum protection of decorative stone flooring. When repairs are necessary, Paragon can be restored to a like new appearance by recoating, spray buffing or high speed burnishing.

High Speed Maintenance

On smooth stone floors like terrazzo, Paragon can be burnished to a dazzling luster with electric or propane equipment. To insure optimum response, clean floor with Wayne Auto Prep Cleaner and Conditioner before polishing.

- ☑ Great Adhesion
- ☑ Superior Durability
- ☑ Beautiful Shine

Manufactured by:

Wayne Concept Manufacturing Co., Inc.
Fort Wayne, IN 46825 260-482-8615

Serving the maintenance community since 1933

Note: On uneven flooring, like slate or quarry tile, the use of synthetic polishing and scrubbing brushes instead of abrasive pads will provide superior results.

Due to the almost total lack of porosity on glazed ceramic tile, an adhesion test should be run before application. Your Wayne representative will be happy to assist you.

We do not recommend the use of this or any other sealer on stone floors in kitchens where cooking oils might cause slippery conditions.
