

STEEL SHINE

Stainless Steel Treatment

- ✓ **Fast**
- ✓ **Efficient**
- ✓ **Economical**
- ✓ **Contains no chlorinated solvents**

One Step Cleaner, Polish and Protectant ...

Steel Shine is a solvent based cleaner, polish and preservative fortified with natural citrus solvents and glycol ethers. Used as directed it removes grease, oil and smudges with little or no rubbing and imparts a hard protective coating that resists resoiling and provides a rich deep gloss.

Easy to Apply ...

Works in one simple operation. Just apply a little Steel Shine to a clean soft cloth and wipe over surface to be treated. Remove any surplus by polishing with a dry cloth and the job is done. It couldn't be easier. No streaks, no rainbows ... just a clear, lustrous shine.

Safe and Pleasant To Use ...

Steel Shine is formulated without dangerous chlorinated solvents or harsh abrasives that can mar polished metal. It is safe to use on stainless steel, chrome, aluminum, copper and other decorative polished metals.

Product# J11SS
Cs/12 Quarts
