

Wayne®

Ready-to-Use Spray Buff Floor Restorer

Reply R.T.U. keeps appearance levels high and time and material requirements low. Regular maintenance with Wayne Reply R.T.U. enhances gloss and restores the moisture lost during burnishing of acrylic finishes, thereby extending finish life and reducing the frequency of recoating and stripping.

Not recommended for use on unfinished wood or polished concrete.

Use Directions:

- Remove gross soil such as heavy tar, paper, gum, etc., and then dust mop.
- Using a spray bottle, spray two or three full sprays on an area about 4'x6'.
- With a spray buff pad (a Jackaroo pad works best in most cases), make several passes with a floor machine to spread out the product and buff to gloss.
- After buffing is completed, dust mop floor.

- ☑ Restores gloss
- ☑ Heals deep scuffs
- ☑ Stops finish burnout
- ☑ Non-yellowing
- ☑ Extends finish life
- ☑ No build up

Floor Preparation

- If floor shows uneven wear, heavy build-up, or deep ground-in dirt, floor should be stripped and 4-6 base coats of Wayne Endura Floor Finish applied before resuming use of Reply RTU Spray Buff.
- Heavy traffic areas may occasionally require additional floor finish to maintain an adequate base. When recoating is necessary, simply scrub floor with SKIM and a Thinline maroon pad, rinse and re-apply 2 coats of Wayne Endura Floor Finish.
