

LLD

Liquid Laundry Detergent

- ☑ Fabric Safe ... mild pH
- ☑ Safe on colors
- ☑ Deep cleans
- ☑ Low use cost
- ☑ Light, clean fragrance
- ☑ Prevents soil redeposition

FABRIC SAFE

- ◆ Mild pH won't affect density of dark colors or contribute to fabric stress, shrinking or fading.
- ◆ Great for frequently washed articles.

BETTER CLEANING

- ◆ High concentration of blended anionic and nonionic surfactants deep cleans and lifts normal soils without harsh caustics, solvents or phosphates.

BETTER FINISH

- ◆ Special polymer anti-soil redeposition agent captures & suspends dissolved soils in the wash solution to prevent soil redeposition and promote thorough rinsing.

LIGHT, CLEAN FRAGRANCE

- ◆ Leaves laundered items with a subtle after scent ... not a blast of flowery perfume, but a mild, pleasing aroma.

VERSATILE

- ◆ LLD is ideal for use as a stand alone detergent for conventional top or front loading washers.
- ◆ It is also suggested as a high performance detergent component for use with alkaline soil break, bleach, detergent, sour and softener commercial installations.

Product #

J11LL1 1-Gallon

J11LL5 5-Gallon

TOP LOADING MACHINES

Use 1-2 oz. per load depending on soil conditions and load size.

For severe conditions, use 4 oz. per load and double rinse.

FRONT LOADING MACHINES

Use 1-2 oz. per load

COMMERCIAL MACHINES

For use with complete, computerized dispensing systems.
