

BALANCE L.S.

Low Suds - No Rinse Floor Cleaner For I-Mop and Automatic Scrubbers

Balance L.S. is a specially formulated detergent designed for use with automatic floor scrubbing equipment. It is made with selected low foam ingredients to eliminate vacuum motor damage caused by excessive suds in recovery tanks. An effective corrosion inhibitor is incorporated to protect steel recovery tanks, internal valves and fittings. An essentially neutral compound, Balance L.S. will not dull highly polished floors at recommended dilutions. Under normal soil conditions, Balance L.S. requires no rinsing and will leave no streaks, haze or films. It is recommended for use on resilient tile, quarry, marble, LVT flooring, terrazzo and polished wood floors.

- ✓ Safe
- ✓ Effective
- ✓ No dulling film
- ✓ Preserves the shine
- ✓ Economical
- ✓ Protects equipment
- ✓ Safe for LVT floors
- ✓ Recommended for I-Mops

**Remove the soil &
Protect the shine
IN 1 EASY STEP!**

To achieve optimum results from automatic scrubbers, it is important that detergent concentration, brush or pad selection and best method of application be coordinated. For assistance in refining your program, contact your **Wayne** products representative.
