LDX-32

Extra Strength Liquid Laundry Detergent

- ✓ Extra grease cutting power
- ✓ Convenient "one-shot" application
- ✓ Rinse clean
- ✓ Fabric safe
- ✓ Low use cost
- ✓ Deodorizes

Wayne LDX-32 is a heavy duty, industrial laundry detergent made for cleaning greasy shop towels, wipers, kitchen towels, aprons, napkins and table covers. LDX-32 can be used in both manual application and automatic dispensers. It is a convenient, one-shot laundry aid requiring no additional boosters or dangerous caustic breaks for most industrial soils. LDX-32 contains soil anti-redeposition agents to suspend heavy soil loads and prevent greying caused by soil washing back into fabric. Free rinsing, LDX-32 leaves laundry soft and natural without alkaline residue or detergent film. Highly concentrated, as little as 1/4 cup of LDX-32 is usually all it takes for most jobs. A fresh, citrus fragrance completes the job by eliminating musty odors and leaving a pleasant clean aroma.

DESCRIPTION

An amber, semi-viscous liquid with a light citrus fragrance. Chemically, a blend of water conditioners, selected phosphate builders, blended nonionic and anionic surfactants, fabric conditioners and soil anti-redeposition agents.

Product# J11LX1 1-Gallon
