# **MILLENNIA 2000**

## **HIGH SPEED FLOOR FINISH**

### **Product Profile**

#### **Product Description**

A high solids, high gloss floor polish formulated for use in medium frequency maintenance plans. Millennia 2000 delivers exceptional gloss, excellent durability and ease of application and repair.

#### **Use On**

Resilient tile, linoleum, terrazo and sealed concrete.

### **Features**

#### **Easy Preparation**

Millennia 2000 is compatible with most acrylic or polymer floor coatings. If floor is not discolored or deeply marked, a top scrub with Skim precoat cleaner and conditioner and a scrubber equipped with a maroon conditioning pad will provide a satisfactory base.

#### **Requires No Undercoat**

Millennia 2000 is self-sealing and eliminates the labor and expense of a separate primer.

#### **Trouble Free Application**

Millennia 2000 provides an excellent balance of toughness and repairability. It is hard enough to prevent dirt penetration and deep black marks while retaining film pliability to allow easy repair with a simple dry burnish.

#### **Beauty That Lasts**

Millennia 2000 looks great the day it is applied and even better with proper maintenance. Each burnishing serves to deepen and enrich the gloss while toughening the coating to further reduce surface tracking and marking.

### **Specifications**

Type: . . . . . Styrene acrylic  
N.V. Solids: . . . . . 20%  
Specific Gravity: . . . . . 1.029

Weight per Gallon: . . . . . 8.56 lbs.  
Coverage: . . . . . 2,500-3,000 sq'/gallon
